Data egress

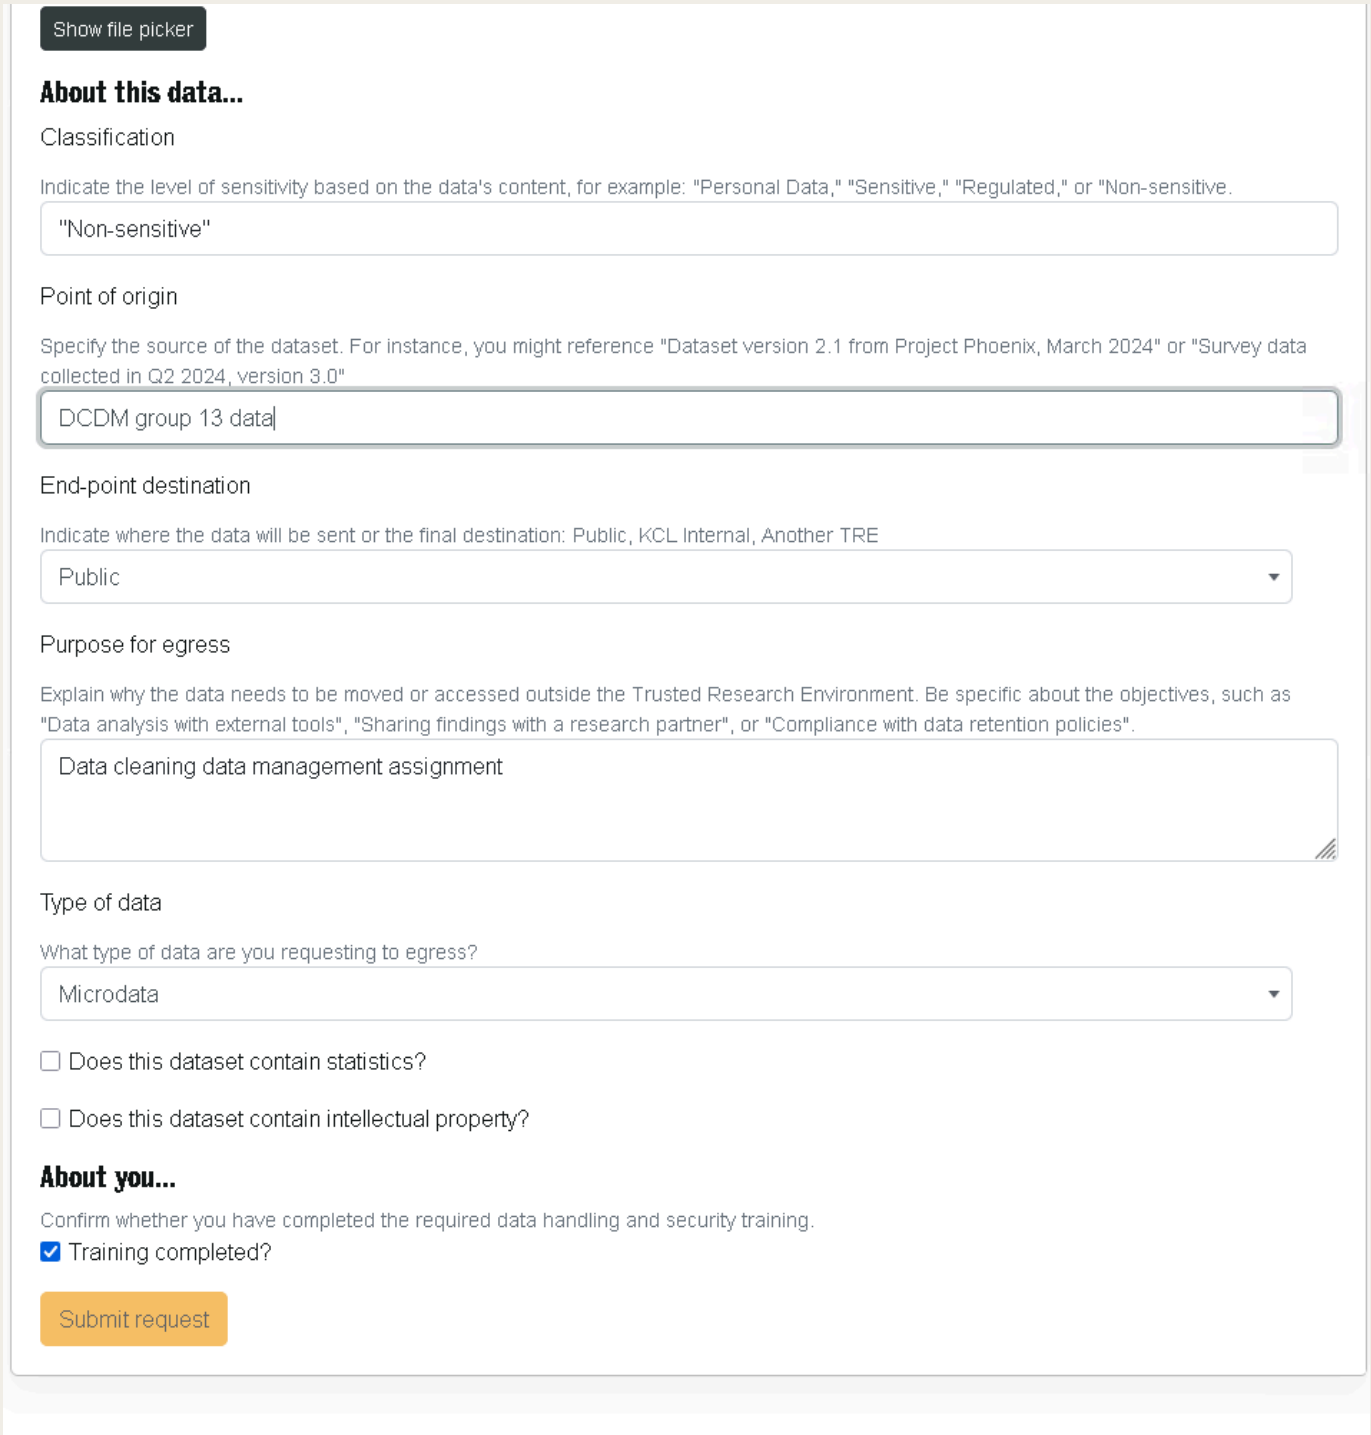

> *By Tim O'Meara*

Step 1. I accessed the virtual desktop through **this link**

Setp 2. I then entered the egress request

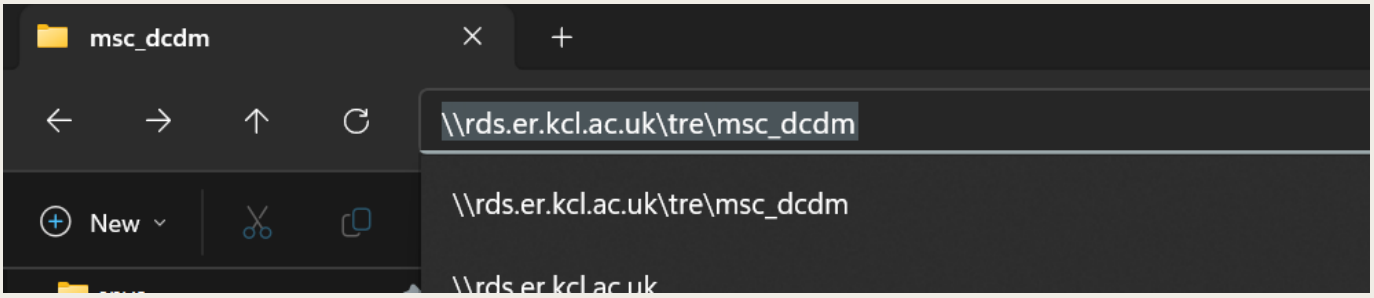

Step 3. I filled in the request using roughly these parameters (cant 100% remember)

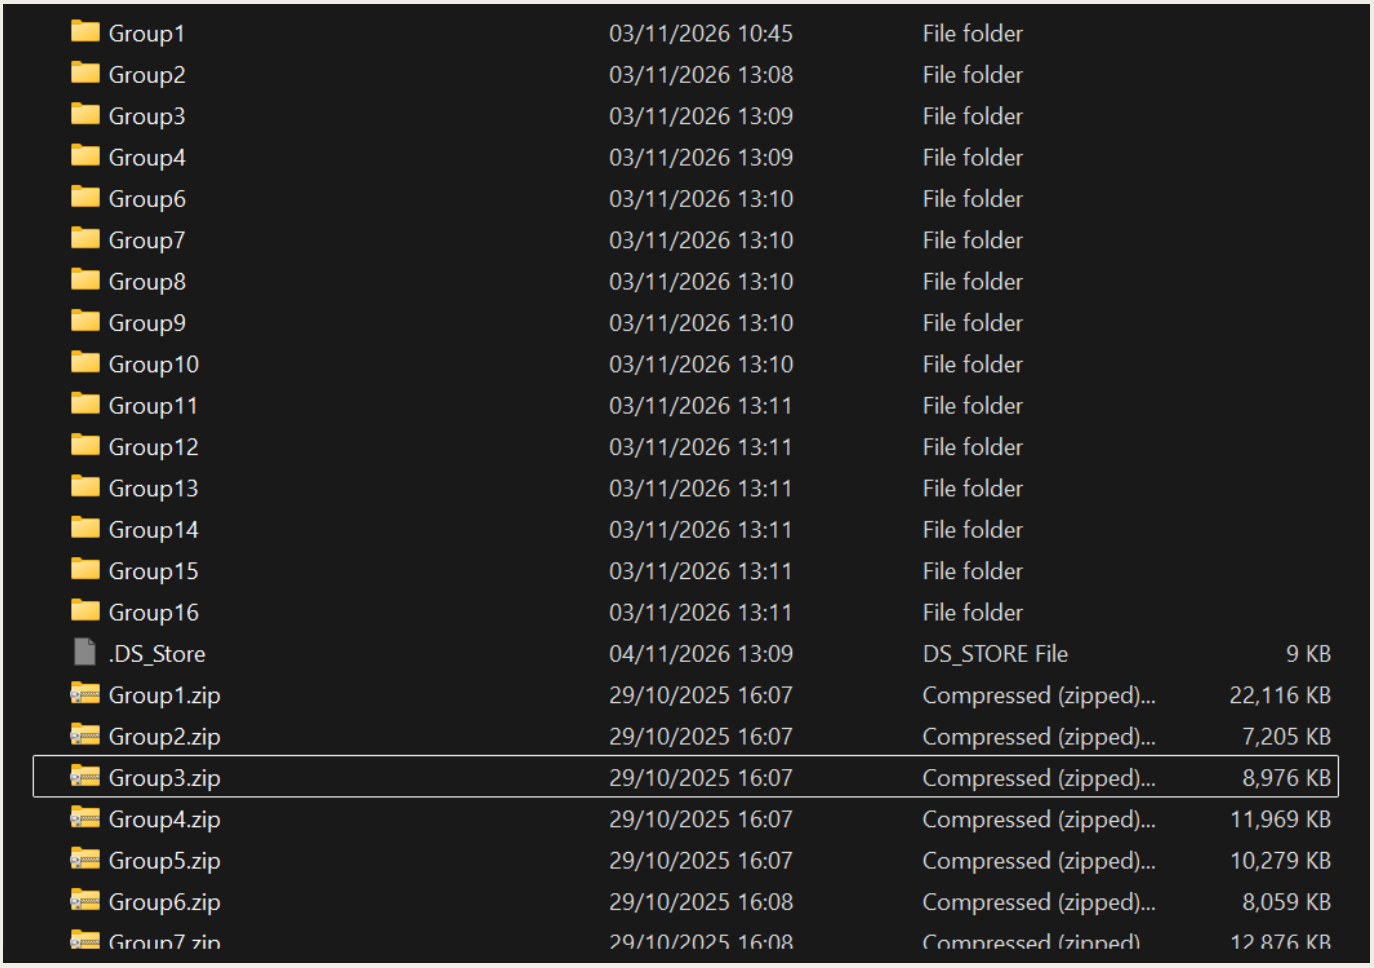

Step 4. It took a couple of days for the request to be accepted. When it was, I followed the advice at this link (TRE Guides - King's College London ARC).

I went in to waterloo campus to connect to eduroam.

In my file explorer I typed this in:

Allowing me to see all the files for all group projects.

I downloaded our groups folder, and the .zip file associated with our group too.
